GAUTENG

2194

South Africa

## Core workshop workflow

- Quote to job card to work-in-progress to final costing to invoice in one connected system.
- Branded quote, job, costing, invoice, and customer-facing PDF outputs.
- Customer approvals, quote views, invoice views, digital clearance flows, and timestamped workflow activity.

## Operational controls

- Customer and vehicle records linked to the repair workflow.
- Roles and permissions for controlled staff access.
- Business settings and workshop company profile setup for branding, templates, defaults, and document details.

## Delivery model

- Browser-based SaaS with no customer-managed server or local software installation required.
- Founder-led onboarding and support for workshops getting started.
- Built specifically for South African panel shops and insurer-related repair administration.

# Integration, privacy, and security summary

The notes below are intentionally factual for supplier, procurement, and OEM review. They do not state or imply OEM approval.

## Integration context

- BAMS integration workflows are available where enabled for workshops using them in their process.
- Lightstone Auto integration workflows are available where enabled for workshops using them in their process.
- Audatex-related workflow support is in progress and is not generally available yet.
- This profile does not state or imply OEM approval; approval should be confirmed by the relevant OEM.

## Privacy, access, and security

- PanelDesk applies a POPIA-first approach. For workshop data entered into the service, the workshop remains the responsible party and PanelDesk acts as an operator where applicable.
- Customer-facing quote, invoice, and clearance links use token-validated access so customers do not need public login accounts.
- Operational controls described publicly include authentication checks, permission-based access controls, rate limiting, scoped upload controls, audit logging, webhook signature verification, and service backup practices.
- Public legal and privacy material is available through the Privacy Policy, Terms of Service, and PAIA Manual.

# Workshop feedback and procurement contacts

*"We started using PanelDesk, and it has made quoting and follow-ups much easier for us. Because it is cloud-based, we can quote from anywhere and are not tied down to one location anymore. Having everything in one place - from quotes to invoices - has already saved us time."*

## **Brilliant Shine - Panel Beaters**

Randburg, Gauteng, South Africa

*"PanelDesk is straightforward, easy to use, and very user-friendly. We can handle everything inside the application, which keeps the whole process in one place and makes the day-to-day running of the workshop much simpler."*

## **Wizard Autobody**

Midrand, Gauteng, South Africa

## **Procurement follow-up**

Additional procurement documents or confirmations can be requested from Sam Fourie. Email [sam@paneldesk.co.za](mailto:sam@paneldesk.co.za) or use WhatsApp on +27 60 282 3056.
